This app has been designed for those who want to learn Tamil as a language and not as a subject. It is for people who would like to learn the language by sitting on their couch and watching TV or sitting on their iPhone or iPad and doing something else. The book is divided into small lessons which you should learn before progressing forward. However, if you miss a lesson, you can return to it later and review it at any time. It doesn't matter if you begin with lesson 1 or lesson 10, there will be no confusion.. You can turn on or off the Tamil script to meet your learning style. You can share your favorite lessons with friends by email. The app uses accurate spellings to make sure you are always saying the words correctly, unlike many other books or computer programs, which may use incorrect pronunciation. It is targeted toward learners who are not yet able to read Tamil script, but are able to read English. However, if you already know how to read Tamil script, then it is programmed so that you can learn even faster by turning off the English translation and allowing you to be tested on both reading and listening skills. The app includes thousands of sentences which have been used by native speakers in professional movies and TV shows.
